Reagents

REF		CONT
SDBUF-B00	Sample Dilution Buffer	2 x 70 mL
SDBUF-H00	Sample Dilution Buffer	8 x 70 mL
SDBUF-L00	Sample Dilution Buffer	16 x 70 mL

Other necessary products

REF		CONT
CACOL-B00	Universal kit	1 x 18 mL R1 + 1 x 7.5 mL R2
CACOL-H00	Universal kit	3 x 18 mL R1 + 3 x 7.5 mL R2
CACOL-L00	Universal kit	7 x 18 mL R1 + 7 x 7.5 mL R2
CAREK-000	Calprotectin Calibrators Kit (6 Levels)	6 x 1 mL
CACOS-002	Calprotectin Low Control	1 x 2 mL
CACON-002	Calprotectin Medium Control	1 x 2 mL
CACOX-002	Calprotectin High Control	1 x 2 mL

Field of application - Purpose

Sample Dilution Buffer is a dilution buffer necessary for the determination of calprotectin concentration in faecal extract.

Method principle

The gold particles in colloidal form are stabilized using monoclonal antibodies directed specifically against human calprotectin. The reaction of these conjugates with human calprotectin, present in a biological sample, causes the specific agglutination of the gold particles. This agglutination, directly proportional to the concentration of the calprotectin in the sample, is read at 546 nm and 600 nm.

Warning and precautions

- For in vitro diagnostic use only.
- Must be handled by qualified personnel under the responsibility of a biologist.
- The human-origin products have been screened and found negative for HIV 1 and 2 antibodies, HCV antibodies and HBAg, but they must nevertheless be handled as potentially infectious products.
- These products contain sodium azide. Products containing sodium azide must be handled with care: avoid ingestion and contact with the skin or mucous membranes.
- Sodium azide becomes explosive on contact with heavy metals such as copper or lead.

Buffer

Composition and concentrations/Storage

Active components:

None

Other components:

Buffer, stabiliser, inorganic salt and preservative.

Sample Dilution Buffer

Universal kit

CALPROGOLD™

Conservation temperature:

2 - 8 °C.

Preparation

Ready to use.

Storage and stability

Reagents are stable until the expiration date printed on the packaging (months passed), under the following recommended storage and handling conditions:

- Unopened vial stored at temperature indicated on packaging.
- Opened vial: closed immediately after use or placed on closed analyser intended for this purpose, not contaminated by handling and stored at the temperature indicated on the packaging.
- Reagent is shipped at 2-8°C.

Note:

- Do not freeze the buffer.

Other materials required

Usual laboratory equipment including an analytical system equipped with a photometric detector.

Utilisation procedure

If the application is not installed on your analyzer, please contact DiAgam. CE validated applications are available from the manufacturer.

For a detailed description on how run an assay, please refer to the operating instructions for your system.

Sample Dilution Buffer

Universal kit

Symbols legend

The following symbols may appear on the packaging and the label:

LOT	Batch code	BUF	Buffer
	Use until	CAL	Calibrator
	Manufacturer	H	High
IVD	In vitro diagnostic medical device	M	Moderate
	Temperature (Storage at)	L	Low
REF	Catalogue reference	4 LEV	4 levels
	Read the usage instructions	5 LEV	5 levels
REAG	Reagent	6 LEV	6 levels
KIT	Kit	CONTROL	Control
CONT	Content		This product meets the requirements of European Directive 98/79 EC concerning in vitro diagnostic medical devices
AB	Antibody or Antisera
